Case Study - SESPP

Brief

The SESPP (South East Succession Planning Programme) required an online method of surveying delegates and their colleagues/peers to provide a 360 degree evaluation of their skills and qualities.

Solution

Netready partnered with SESPP to create designs for the new site that were viewed and approved by the client prior to their implementation. Netready then used components from the established ALICSE system,

allowing users to be registered, evaluated (both self and 360 evaluation) and reminded of evaluation tasks. Each learning account has a portfolio option as well as a resource area, where key documents and forms can be stored.

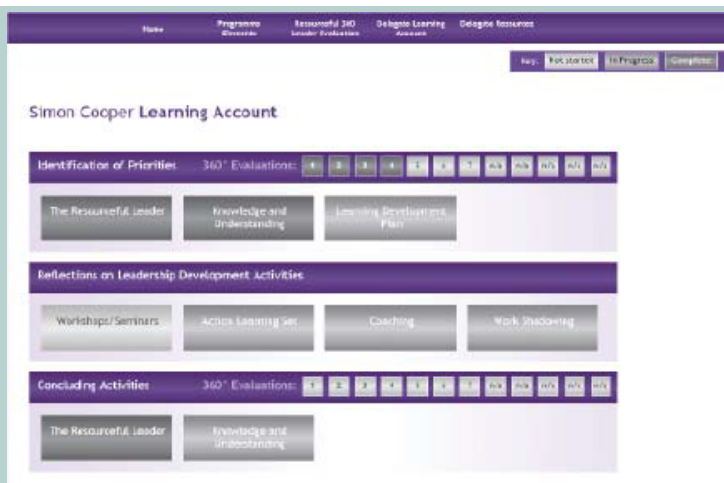

Delegates are assigned to leaders and affiliates, who can then monitor each delegate's progress.

Users can then generate and print meaningful reports to assist the learning process.

Straightforward and user friendly

**SE Sector Led
Improvement Programme**

The 360 system was successfully implemented within a short timescale and completed to budget.

SESPP's 360 allows site users to:

- Easily navigate the system
- Complete self-evaluation
- Send 360 reminders to respondents
- Generate and view reports
- View portfolios
- Register online
- Gain access to forums

SESPP has the ability to:

- Build on the current system
- Add and update news items
- Efficiently manage the 360 evaluation process
- View progress on individual and group evaluations
- Send reminder emails and follow up information
